## More vision, more safety with the FendtONE camera system

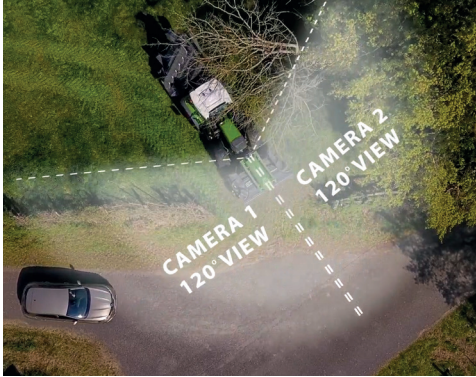

Now available in your  
local Fendt dealership

# High definition Ethernet camera

It's not always easy to keep an eye on everything around you and to keep others safe whilst operating your large tractors or harvesting machines. Whether on the road or in the field, around the farm or seeing what you cannot see easily, this high definition camera will help you obtain the vision you require. Perfect for any agricultural work.

## Features & Benefits

- High definition imaging (1.2 MP)
- Resistant against vibration, dust, high water pressure and corrosion
- Real-time video transmission
- More vision thanks to a 120° horizontal, 91° vertical lens angle
- No electromagnetic interference
- Several display possibilities

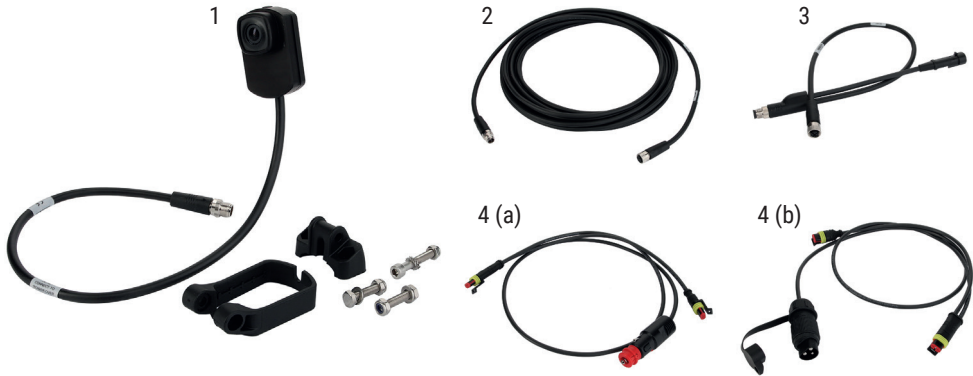

## Machine Compatibility

- Fendt tractors that are equipped with the FendtOne workstation are compatible with this camera system\*. Please check that your tractor cab is installed with digital connection ports to operate the Ethernet camera.

*\*Depending on your model, variant and option.*
