

MASSEY FERGUSON

We're expanding our reman injector offering

AGCO's remanufactured common rail injectors for your Massey Ferguson machines encompassing Tier 3, 4 cylinder and 6 cylinder engines have been designed, engineered & tested to perform to OE specifications. So you can choose AGCO with 100% confidence, knowing you're getting a proven quality, reliable part that can be installed right 1st time. Furthermore, it's kinder to both the environment and your customer's wallet. With the backing of expert technical and warranty support, technicians can fit our injectors with confidence knowing they're installing a superior quality product.

Why us?

- Reduced back leak for improved cold/hot start cycles*
- Less component leakage resulting in fewer pumping losses & improved engine efficiency*
- Cost-effective solution versus new
- Up-to 70% less material & 85% less energy than new
- All AGCO reman parts are assembled and tested to meet the OE standards so you get the same quality, specification, performance and warranty as new at a cheaper price.

Just put us to the test to see for yourself...

*based on performance and endurance test data using simulated injector operating conditions
