

FENDT

Genuine Accessories

RANGE OVERVIEW

Factory Engineered, Dealer Fit Accessories

Fendt tractors have a global reputation for uncompromised high standards of engineering design and manufacturing quality, offering unrivalled levels of operator comfort. Genuine Fendt accessories from AGCO Parts offer the same high levels of durability performance and engineering standards expected of the Fendt machine.

The comprehensive range includes front weights and rear hitches, external lighting and technology solutions such as Section Control, Variotronic^{TI} and VarioGuide, all covered by AGCO Parts 12 month warranty*.

EXTENDED WARRANTY – UP TO 5 YEARS ACCESSORIES COVER*

Fendt accessories fitted to a machine with extended warranty within the first 12 months of registration by the dealer, are covered for the period of warranty remaining.

*Terms and conditions apply and are available on request. Exclusions may apply.

ACCESSORY HIGHLIGHTS

Weights

An integral part of setting up the machine is ensuring the correct ballast is used. AGCO Parts offer a range of genuine cast iron weights, designed by Fendt engineering to ensure optimum ballast for the task in hand.

Front Linkage and PTO

Ensure your linkage meets factory specified tolerance, performance and superior installation standards by insisting on genuine front linkage and PTO products available through AGCO Parts.

Front Fender and Rear Mudguard Kits

Replace or upgrade your tractor with genuine fender and mudguard kits designed by Fendt to ensure wheel clearance conformity and durability.

Pivoting front fenders and rear mudguard extension kits provide clear visibility and protect the cab glass from potential damage from debris thrown up from the wheels.

ACCESSORY HIGHLIGHTS

Fendt Cargo

Designed, engineered and built by Fendt for Fendt. No other loader solution offers the Fendt Cargo's superior integration with the tractor and high quality performance.

Whether you are moving silage or earth, grain or hay, the Fendt Cargo is the ultimate loader.

The Fendt CargoProfi offers an intelligent front loader. Featuring an integrated weighing system, programmable work parameters and previous setting recall. All controlled and displayed through the Varioterminal. This enables the operator to restrict beam height if working in a confined space or monitor the weight not only of each load lifted but also the total weight of a complete job.

Rear Hitches

There is a wide range of hitch designs to enable your Fendt to be equipped with your preferred rear towing solution for haulage or implement attachment.

Compressed Air & Hydraulic Solutions

Whether it is a compressed air system, additional spool valves or larger capacity hydraulic pump required, there is a robust range of Fendt engineered solutions available.

Auxiliary Lighting

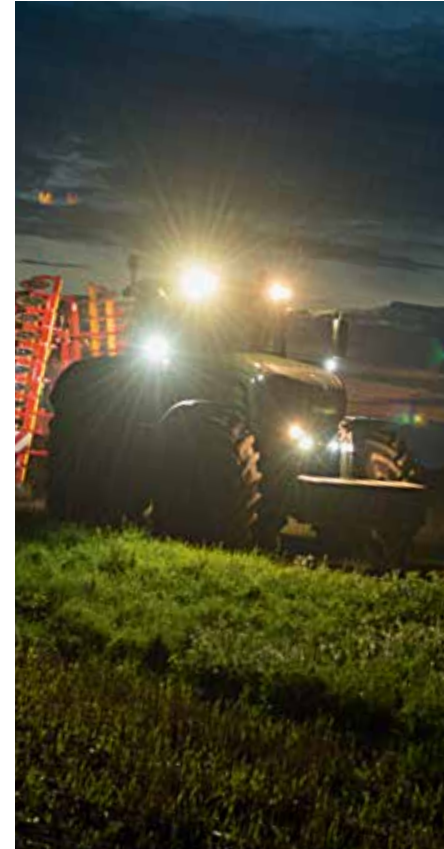

Take a look at the Fendt range of worklamps and rotating beacons to ensure the very best 24 hour visibility of implements at work.

Engine & Transmission Pre-Heaters

Ensuring that even in the harshest environments, your Fendt will be ready for action.

Operator Environment

From pollution filters and genuine Fendt seating, for superb comfort and cabin integration to accessory rails and mounts for electronic devices. Fendt offer a range of in cab accessories to further improve comfort and functionality.

TECHNOLOGY SOLUTIONS SUMMARY

VarioGuide

Operators can reduce overlapping and monitor their rig through the map view on the Varioterminal. Guidance compatibility with GPS, GLONASS and the planned European Gaillileo system.

- ✓ VarioGuide – Automatic steering system
- ✓ Maximum use of implement width by reducing overlap
- ✓ Optimal spacing of plant/seeding material
- ✓ Optimal performance in all light conditions

A full range of upgradeable accuracy options, to suit applications from spraying and stubble management to row cropping:

Standard (Free)	EGNOS	+/- 30cm
Subscription	VBS	+/- 20cm
Subscription	RTK	+/- 2cm
Base station	HiPer Ag RTK	+/-2cm

Section Control

Fully automatic section control using GPS to give the desired degree of overlapping of sprayers/seed drills, reduces seed and fertiliser use and ensures precise work results day and night. ISOBUS compatible.

Fendt Variotronic^{TI}

Variotronic^{TI} headland management enables the operator to create operating sequences for turns, including linkage/PTO and engine control and save them in the Varioterminal.

Fendt VarioDoc / VarioDoc Pro

Offers near real-time documentation and wireless data transfer via Bluetooth or mobile network of task and machine performance data. ISOXML files are compatible with a range of farm management software solutions.
