

AS GOOD TODAY AS THEY'VE ALWAYS BEEN

MASSEY FERGUSON

It takes a big tractor to tackle your biggest jobs.

So we built the MF 2005.

When there are bigger jobs to be tackled, Massey-Ferguson has the answer. The three models in the MF 2005 Series, ranging from 117-158 hp in 2WD or 4WD versions, are designed to meet the highest standard of quality and reliability.

These rugged machines will go on working tirelessly and efficiently, day in day out, year after year.

Just look at the features that make the 2005 such an outstanding

performer. A spacious comfortable operating environment whether platform or fully air-conditioned cab.

Economical six cylinder Perkins engines. An exceptional 16 speed gearbox with Speed shift change on the move. Powerful hydraulics for smooth performance and impressive lift capacity. Option of MF's new 'Electronic Linkage Control' system. Dual wheels available for even better ground flotation. And it's all backed by a dealer parts and service network you can rely on. Increased performance. Increased output. Increased profitability. That's what you want from a big tractor. That's what you get with the MF 2005.

Massey-Ferguson
Where farmers' ideas take
